# 2 | Cottage Color

House Number 38

**38** This house is a showstopper. Designed with thoughtful detailing throughout the property, it features subtle, sophisticated colors. The field color is a warm, soft neutral with an occasional white-washed effect on the garage door and bay windows. The

light teal window and roof tile colors are a refreshing addition that suits the architecture and provides a bit of a punch. Rather than being a standard “gray” concrete, the stone aggregate paving is an integral buff color that blends with the house color. It’s a subtle but extremely effective detail that elevates the con-

crete product to another level. The color and landscaping are combined differently on each part of the house, yet tie in beautifully with each other. A lush backyard invites relaxation, while old-growth trees soften the architecture, adding a casual elegance to the ambiance of the property.
